

HERE WE ARE!

History

We will be learning about different periods in time to start understanding chronological timelines.

We will trace the history of Earth from the Big Bang, dinosaurs, the moon landing and modern times.

We will learn about the moon landing and compare the astronauts Neil Armstrong and Tim Peake.

We will also look at our personal history and create a timeline of our own lives.

English

We will be reading '*Here we are*' by Oliver Jeffers and '*Whatever Next*' by Jill Murphy.

Science

We will be learning about animals—classifying them into 5 key groups: mammals, birds, reptiles, amphibians and fish.

Additionally, we will be learning the vocabulary: **carnivore** (eats meat), **omnivore** (eats both meat and plants) and **herbivore** (eats plants) and classifying different animals according to what they eat.

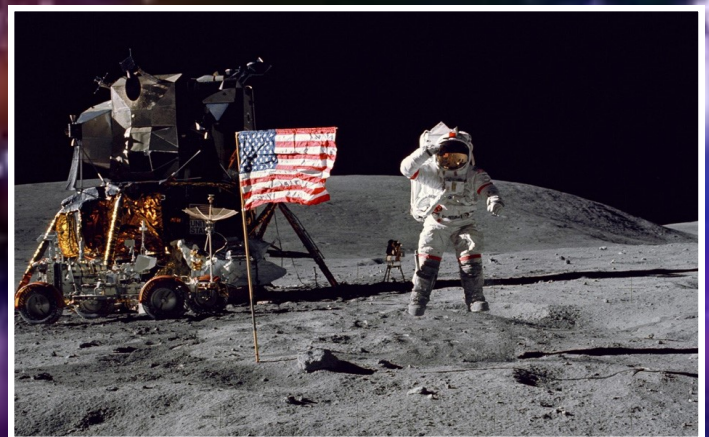

We will continue observing seasonal changes in our local area as Winter progresses into Spring.

Art and Design Technology.

We will:

- Explore different artistic techniques to make a collaborative planet Earth.
- explore shading and texture by using pastels to create a moonscape picture.

Inspirational People

Katherine Johnson—mathematician.

Neil Armstrong—astronaut.

Tim Peake—astronaut.

Mary Anning—palaeontologist.
